

**IAOO**  
**2019**

**ROME Italy**

**31 August**

**1-2-3 September**

**Joining efforts for improved outcomes and quality of care**

**7<sup>th</sup> WORLD CONGRESS of the International Academy of Oral Oncology**

## TENTATIVE TOPICS

### KEYNOTES

- Viruses and bacteria in oncogenesis
- Radiation: Protons
- Quality of care/Audits in oncology/Value Based Health Care
- WHO initiatives in cancer care
- Immunotherapy: inflammation and tumors
- Frontiers Maxillofacial reconstruction
- Robotic Surgery

### INSTRUCTIONAL COURSES AND VIDEOS

- Surgery for parotid cancer
- Parapharyngeal space tumors: minimally invasive
- Technique of Perforator flap in head and neck reconstruction
- The supraclavicular Island Flap
- Robot Assisted Neck Dissection
- Supra Omo-hyoid Neck Dissection
- Infrahyoid Flap in Head and neck Reconstruction
- Other flaps: FRFF, ALT
- Marginal versus segmental resection
- Ultrasound in head and neck cancer
- Implant borne dental rehabilitation following maxillofacial reconstruction
- Electro chemotherapy; Photodynamic therapy in oral cancer
- Prosthodontic rehabilitation
- Fibula reconstruction
- Sentinel Node
- Compartmental tongue resection
- Brachytherapy
- Deminishing RT toxicity
- Induction chemotherapy: role?
- Deintensification
- Radiology teaching: staging, bone involvement mandible
- How to resect and report the specimen. WHO classification of salivary glands, dysplasia's
- Role of HPV out of oropharynx: how to assess HPV
- New TNM: oral cavity and oropharynx
- Sarcomas: osteosarcomas and soft tissue sarcomas
- Mucosal melanoma/rare tumors of the oral cavity
- Benign Mandibular tumors: classification/management

### DEBATES

- "Surgery based" treatment vs. "radiation based" treatment for stage III - oropharyngeal cancers
- Preventive versus reactive gastrostomy
- Lymph node Management in salivary gland: surgery versus RT
- Sentinel node technique in Floor of Mouth
- Dose reduction or not after minimal resection margins in oropharyngeal transoral resection
- TORS versus TLM

## PANELS, ROUND TABLES

- Salvage Recurrent Oral Cancer
- Salivary gland cancer panel
- Sentinel node mapping: problems and pitfalls
- Management ORN
- Palliative management: decision on the limits of treatment
- CRT in the management of advanced oral cancer
- Robotic Surgery

## SYMPOSIA AND WORKSHOPS

- Implications of the 2017 TNM staging for oral and oropharyngeal Cancer
- Re-irradiation in head and neck cancer
- Targeted therapy in oral and oropharyngeal cancer
- Value of induction chemotherapy
- Genomics session
- Immunotherapy: Biomarkers predicting outcome
- Oral cancer and the microbiome
- Salivary gland Cancer: new developments
- Liquid biopsies
- Novel biomarkers predicting outcome
- Optical diagnostics 1
- Optical diagnostics 2
- Surgical margin assessment and management
- Early oral Cancer/Precancer
- Treatment of oral leukoplakia - early cancer
- Advances in radiation therapy to minimize morbidity in oral and oropharyngeal cancer
- New Radiotherapy Approaches
- HPV and deintensification in oropharynx cancer
- Targeted therapy
- New developments in Imaging for Oral Cancer
- Maxillofacial Reconstruction
- Reconstruction of soft tissue defects for oral cancer
- Frontiers in Maxillofacial & Mandibular Reconstruction
- Comorbidity and frail Oral cancer patients
- Virtual Therapy: predicting functional outcome
- Rehabilitation and supportive care
- Dysphagia
- PROMS-PREMS
- Organizing care: Treatment delay, surveillance
- Quality-safety

## TUMOR BOARDS

- Oral Dysplasia: Histopathology- Genetics: Management, Narrow band Imaging
- Improving communication and care by involving patient societies
- Marginal versus segmental mandibulectomy
- Loco-regionally advanced oral cancer
